Rudolph Valentino in "The Son of the Sheikh" with Vilma Banky

Ab! Here is Romance—here is love such as only Valentino can portray it. Here is Son of the Sheikh who is a greater master than was his father before him. An eye feast of virile action, colorful settings and glowing climaxes. Riding like the wind! Fighting like a Bedouin, this fiery Son of the Sheikh burst in upon them and before their very eyes snatched Yasmin, dancing girl, the toast of the desert, and was away before one hand could stop him.

Rudolph Valentino's Greatest Achievement

Coming Next Tues., Aug. 16

EDDIE BURTON and his De Luxe Orchestra, playing a Special Comedy Picture, "TIN HATS," and a real up-to-the-minute DANCE after the show. A guaranteed entertainment.

Local and General

H. Lusk, of Calgary, is the guest of J. F. Harper.

Pickling Cukes, just a few cases, 20 lbs. for \$1.75—Campbell's.

Del Sommers, of Vancouver, is here looking after farm interests.

Mrs. C. Williamson is on a visit to her sister at Delta, Alberta.

Mrs. Money, of Calgary, is on a visit to her parents, Mr. and Mrs. J. A. Brown.

O. and M. Smith were among the winners in the racing events at the Carmanagay fair.

Mrs. Hollinger (nee Miss Vera Smith), of Claresholm, is visiting relatives in this vicinity.

Mr. and Mrs. J. D. McDougall motored to Lethbridge on Tuesday, returning the following day.

F. Caldwell and family returned recently from a holiday spent at Banff and other mountain resorts.

Their sure "The Berries" at Campbell's this week and you can have Straw, Rasp, Black or Blue Berries.

Born—On Friday, August 5th, to Mr. and Mrs. Frank Dalsin, twin daughters. Congratulations.

Mrs. G. T. Stoddard and family, of Calgary, are renewing old acquaintances here during the week.

Mr. and Mrs. Dennis Ashmore are receiving congratulations on the birth of a daughter on Tuesday, August 2nd.

E. Tyler delivered a John Deere binder on Monday, the first to leave town this season. T. Parcell was the lucky purchaser.

The Ladies' Aid will meet at the home of Mrs. J. D. McDougall on Thursday, August 18th. Mrs. Wise will assist the hostess.

Miss Sommers, of Illinois, niece of F. O. Sommers, is visiting here. Miss Sommers is on the hospital staff in her home town.

The U.F.A. constituency convener will be held at Carmanagay on Saturday. O. L. McPherson and others will address the meeting.

V. S. McClure arrived home on Monday and is receiving the congratulations of his many friends on his complete restoration to health.

A glorious Romance? Sweeping, dramatic, beautiful. Never has Valentino made such a dashing, vivid, stirring picture as "The Son of the Sheikh."

Dr. and Mrs. Freeze left on Wednesday for a two week's holiday which will be spent at points in Montana where they formerly lived, and other points en route.

Hail! The lover of lovers! The Sheikh of Sheiks! Sparkling, colorful, thrilling! Here is indeed Valentino's greatest and most appealing picture, "The Son of the Sheikh."

F. M. Watts and wife motored to Rimby on Thursday last to visit the former's sister, a nurse in the Royal Alexandra hospital at Edmonton. Mr. and Mrs. Watts returned home on Tuesday.

Mr. and Mrs. A. McCullough returned last Thursday from an extended visit to Ireland and points in England and Scotland. While glad to be home again they are enthusiastic in describing the pleasures of the trip.

Wheat Filling Rapidly

Another week of splendid weather for the filling, which has just passed and rapid progress has been made by all grain. In some instances fields are showing traces of color which would indicate filling well advanced. Anderson Bros., east of town, have a lot of rye already in stock, and some other fields ready to cut are being held to be harvested with combines. Continuous weather of the kind experienced the past week will hurry the ripening of the grain. No damage of any kind has occurred recently.

A son was born to Mr. and Mrs. A. F. McKibbin at Carleton on Tuesday, August 9th.

Rev. and Mrs. Hunt and family are spending their holidays at Stettler and other northern Alberta points.

H. E. Gill was in Calgary on Sunday, where Mrs. Gill is taking special treatment for rheumatism. He found her doing as well as could be expected, with every prospect of continued improvement.

Mr. and Mrs. Wm. Ulrich and son and Miss Ethel McDougall motored to Macleod on Sunday where they visited the Misses Florence and May Ulrich. Mrs. Ulrich stayed in Macleod while Florence returned home to Champion.

Mr. and Mrs. Geo. Harper have been here during the week after returning from Edmonton, where Mr. Harper was on the staff engaged in marking examination papers. Mr. Harper's pupils at Granum were exceptionally successful at the recent examinations.

Louis Fath accompanied one son to Calgary on Monday to receive treatment for tonsillitis and while he was away another son was kicked by a horse, sustaining a broken arm, which necessitated an X Ray examination, for which the boy was taken to Calgary on Tuesday.

F. C. Elford of Ottawa was elected president of the World's Poultry Congress at Ottawa for 1928 at the session of the International gathering which closed at Ottawa on Thursday, succeeding Prof. Edward Brown of London, England, who has held this office for the past year.

Completing the first boatload, a train left Alberta during the past week for Quebec carrying 350 head of horses purchased in the province by officials of the Union of Soviet Socialist Republics. Included in this cargo from Quebec will also be 508 head previously shipped east, bringing the total number of horses purchased by the Russian government in Alberta during the past month up to 957. It is expected that buying for further shipments will again commence at points in the south and southeast of the province on August 8.

The catch limit per day of outthroat, rainbow, Loch Leven and Dolly Varden trout has been reduced to twenty, according to new regulations for the provinces of Alberta and Saskatchewan. This limit applies also in the case of grayling and Rocky Mountain whitefish, while the limit for other fish is as follows: Lake trout, 10; perch or goldeyes, 25; pike or pickerel, 15; bass, 5. In the case of perch and goldeyes no one shall catch and retain more than 25 of either species or of both species than will in the aggregate number more than 25, the same regulation applying to pike and pickerel.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50 cents for first insertion, 25 cents for each subsequent insertion. Commercial rates on application.

THURSDAY, AUG. 11, 1927

NOTES AND COMMENT.

While there was an advertisement from Champion at the Carmangey fair last week it was not because any advertising of the event was done in this vicinity. As far as can be learned there was not even a poster of any kind put up here. Ordinarily it would almost look as though no patrons from Champion were desired.

The work of the different "gangs" in connection with the construction of the Calgary Power Co.'s lines through the town called for considerable admiration from citizens. It is seldom seen an exhibition of efficiency is seen nowadays.

Jailing an automobile instead of its driver sounds at first thought illogical. But a driver who has disregarded the rights of other users of highway might be brought to an exemplary frame of mind very quickly if he were deprived of his car for 30, 60 or 90 days. Doubtless he would rather be punished thus than by being sent to jail himself, but the loss of the car would probably be more effective than the usual fine.—Providence Journal.

"Canadian Pools cannot dictate the price of wheat to buyers of the world. We are only one of a number of countries selling on the world's markets. It is true that we sell more than any other export country, but if Europe is unable to buy our grain at a proper price the buyers will turn to Australia, the Argentine or somewhere else," so declared W. J. Jackman, Pool director, who has been given a position as the Alberta Pools representative in the Argentine, at a meeting of Pools held recently at St. Smith, Alberta. The speaker stated that formerly 75 per cent. of the wheat was dumped on the market in the fall. Now it is sold under the Pools' orderly marketing program. The Pools borrow money from the banks to make the advances to the farmer and thus save the farmer higher interest rates, he said.

It is a matter of regret that supporters of the pool do not follow the line of argument advanced by Mr. Jackman more generally than is the case. It is the many absurd claims made for the pool that weakens the confidence in some of its advocates. For instance, George Melvor, western sales manager of the wheat pool is credited by the U.F.A. with saying a large amount of wheat would have been sold for \$1.00 per bushel had it not been for the pool. This is claiming a dictation of world prices and is the exact opposite of Mr. Jackman's statement. Nonsense of this kind does the pool harm instead of good.

In future years we will be able to refer to 1927 as "The Pool Year." It is very doubtful if any one year for a long time to come will see a greater amount of pain used in this vicinity than has been the case this year. The man who has not painted his buildings is getting into a minority that makes him feel uneasy.

And now the holidays are drawing to a close and harvest is approaching in spite of rather difficult roads the vacation period has been largely enjoyed and a great deal of territory has been covered from this point and many people who never heard of Champion before must now be aware of its existence, while we have had many visitors who have acquired first hand knowledge of one of the biggest wheat growing points in the world.

More than two-thirds of the large number of motor tourists from the American States arriving at the Edmonton auto camp of the Alberta Motor Association desire to see the Peace River country, mainly for the purpose of settling on land. Unfortunately it is not yet possible to travel by motor from Edmonton into that section of the northwest, although the government is engaged in opening the road link of the colonization highway to the north along the southern shore of Lesser Slave lake. Disappointment has been very keen among motorists when they discovered that the only way to reach the Peace River country was by train.—Good Roads Magazine.

White Elephant Coming With Circus

Sacred Animal Making Only American Tour With Ringling Bros. and Barnum & Bailey Shows

Hailed as the "greatest feature of all time," Pawah, the world-famed sacred white elephant of Burma is to be presented in the menagerie of the Ringling Bros. and Barnum and Bailey Combined Shows when the big circus exhibits at **Lethbridge, Wed., Aug. 17, Afternoon Only.**

Pawah is the first of his kind to be found in more than three hundred years and the only genuine sacred white elephant ever brought to America. He is accompanied by his supreme keeper, Dr. S. D. Po Min, and attended by a retinue of fourteen native Burmese. The present is Pawah's only season in America; the Ringling Brothers being under bound to return him to Burma at the close of the season.

Pawah is of those rare elephants that the Buddhists of today and centuries past have worshipped in the belief that in their huge bulk repose the soul of Buddha. And certainly he is as different from those elephants with which the public is familiar as day is from night. His eyes are milk white, set with sparkling pupils. His skin is soft and sparkling. His body is white as a "white man's" white. To quote the French authority, M. Dussard, he is "as gentle as a kitten and as beautiful as a Greek slave."

This rarest of beasts was found eight years ago in the jungles of Lower Burma, midway between Mandalay and Rangoon. Last summer he was brought to England under the protection of the British government.

Cheap and Effective

and in the face of threats from the Buddhist priests who protested that the departure from Burma would bring dire calamities. More than two million people saw Pawah when he was presented under the auspices of the London Zoological society. The bringing of the white elephant to America is in furtherance of the Ringling policy of constant enlargement. The arctic portion of this season's circus introduces five rings in place of the usual three. The Big Show personnel numbers more than sixteen hundred people, and nine hundred horses. A hundred double-length railway cars are required to transport the ten thousand members, plus a special Pullman for Pawah and his attendance.

H. Philpott won the bucking contest at Carmangey.

Work left at the blacksmith shop will receive prompt attention.

ED. DALSIN

Western Canada To Be Important Section Of One Of World's Greatest Countries

Western Canada, "An Area of Diamonds," is destined to be in the years to come one of the greatest parts of one of the greatest countries of the world, according to Roger W. Hanson, prominent statesman and author on business affairs, who addressed the Board of Trade at Calgary recently.

Mr. Hanson dealt with the location, the climate and the resources of the country and to the characteristics of the people who comprise its population. He spoke of the emigration of the Canadian youth to the United States, and deprecating the fact that more about Canada is not taught in the universities in order that attention might be shown that to the United States is but to live and talk and hear for a few years only to be thrown on the scrapheap later, when, but they stay in Canada, they might start from the bottom of the ladder, but surely build business and financial independence for themselves.

Dealing in detail with this exodus, which has been taking place from Canada to the United States, the speaker declared that, during his travels in Canada he has made a point of inquiring from the young people whom he has met, to find out what their primary ambitions are. He has found here many young people from the British Isles and Australia who are staying in Canada to wait their quota in the United States may be thrown open.

"To your universities and colleges, you are teaching your young people about history and the sciences and law, but are you teaching them enough about Canada?" he asked. "Are you teaching them anything about Canada's abundance of resources? Are you telling them the truth about the economic of Canada?"

Much can be done to really assist these young people in educating them to the true economic condition of the United States. At present that country, he continued, is booming forward in a great way, prospering, but the wave cannot always last; the stock markets cannot always continue to go up. There must be a time when the tide will swing the other way and when the depression comes, the Canadians, the English, the Scotch and the Australians will be the first to be cast out of employment. Much can be done to prevent this disaster by the use of proper method of education, he continued.

Canada, he declared, has the proper climate because a temperate climate is necessary for the building of sturdy, virile manhood. Such a climate has always been responsible for the raising of the races of men who have contributed the most to the world's progress, and the speaker gave example in the development of the United States to show that the large majority of the men who really contributed most to the building of the nation's greatness came from the northern climates.

Shipping Horses To Russia

Western Horses Bound For Russia Leave Alberta

The first of the 4,000 Canadian horses ordered by the Russian Soviet government has left Alberta. It is announced by J. M. McCallum of the Canadian Department of Agriculture. Arrangements were made for a trainload of 50 cars, carrying 598 horses, to leave Calgary and Medicine Hat. Although some difficulty has been caused in procuring the number of horses required because of the price offered, Mr. McCallum gave the fact that most of the horses were of the best kind would leave Quebec only a few hours short of the 1,400 previously arranged for.

Advice Seemed Good

Certain art, playing the part of a consumptive here, practiced a real little cough. During the day, when he was coughed continually. After one terrific explosion his old tutor, in the play, had to remark, "My dear friend, what can I do for you?" Whereupon a sympathetic friend from the gallery exclaimed, "If you are his friend, why don't you give him a booming cough?"

Good Prospects For Sheep

Prospects for the sheep industry are most hopeful this year with good prices in sight for both lambs and wool, according to W. H. H. Treadwell, assistant manager of the Canada Co-operative Wool Growers' Association, who has just completed a tour of the wool growing districts of Western Canada.

W. N. U. 1623

Have Become A Menace

Rabbits Undermining Lighthouses At Entrance Of Juan De Fuca Strait

The rabbit, such a pretty and attractive pet when kept in a hutch, is undoubtedly one of the most destructive and dangerous pests among the mammals.

In Australia, millions of dollars worth of damage is done by every year, and hundreds of thousands of dollars have to be spent in eradicating wild forces, laying traps, and so on, to keep down the pests.

A similar state of things exists in California, and now the rabbit is destroying Smith Island at the eastern entrance of the Strait of Juan de Fuca.

Here the animals are proving more destructive than the sea and they have so undermined the lighthouse standing there that it is in danger of falling.

"Twenty-five years ago a former lighthouse keeper took a pair of rabbits to the island and began breeding them to supply the Seattle market. Little realizing what the result of his experiment would be."

The rabbits multiplied at an alarming rate and overran the island, eating every green thing and tunnelling through the soil itself. Not only the lighthouse and the wireless station are now in danger, but the very island itself is threatened, for, undermining as it is, in all directions, and covering only 56 acres, it will fall in a very few years.

It is astonishing what a danger and menace to a country a little animal, which, individually, is not only inoffensive but attractive.

A Modish Separate Blouse and Skirt

Exceedingly smart is the blouse and skirt, a modern, original design, having lines at the shoulders, and a square neck. Contrasting material is used for the bands under the neckline at the left side of the blouse and on the long flitting sleeves, cuffs on the short sleeves, and patch-pocket. The blouse is No. 1589 and is in sizes 24, 26, 28, 30, 32 and 34 inches bust. Skirt requires 2 1/2 yards 29-inch or 1 1/2 yards 34-inch material. Price 29 cents the pattern.

The skirt, having an inverted plait at each side of the front, and slight flares at the back, is joined to a matching belt, having a shirred, top, or shoulder strap. The skirt is No. 1589 and is in sizes 24, 26, 28, 30, 32 and 34 inches bust. Skirt requires 1 1/2 yards 29-inch or 1 1/2 yards 34-inch material. Price 29 cents the pattern.

Our Fashion Book, illustrating the newest and most desirable styles will be of interest to every home dressmaker. Price of the book 10 cents the copy.

England Enjoys Empire Fruits

Depends On Exports From Dominions For Luxury In Winter

In our use of fruit today, as the Secretary of the Dominions has just put it, we are still far behind the United States, the Continent far behind us. The Americans had the start of us by the lack of their position. The United States, possessing not one climate, but many provinces within its own frontiers as abundance of all the fruits of the temperate and sub-tropical zones, and the Tropics are at its doors. Our small islands, though we may boast that the fruits which we grow no use on earth grows better, cannot provide for twelve months in the year. It is only since the Dominions began to develop their natural resources and send us the crops of the orchards under the Southern Cross that we have had peaches and plums in winter and apples all the year round—London Daily Telegraph.

Injustice To Agriculture

Food Shortage Is Predicted In United States Within Next 40 Years

A revolt by the industrial population against food was predicted by the Institute of Politics as a possibility in the United States within the next 40 years.

Here the secretary of the association, in an address on the agricultural situation, described grave dangers that have been due to agriculture during the past six years. He predicted a food shortage within 40 years with results that would be disastrous. Industrial centers a thousand times as many worry as the present farm situation.

He also warned that the industrial population might precipitate trouble when an imminently inadequate food supply compels them to pay more and proportion of their wages for food.

Offer High Price For Poultry

University Of British Columbia Refuses \$1,000 Per Hen

An offer of \$1,000 for the famous hen was refused by the University of British Columbia. The offer was made by a group of last year's Experimental Farm contest at Agassiz, of which Hen No. 6 was one, has been made by Professor Lloyd, of the University of British Columbia, who is in charge of the poultry exhibition at the World's Poultry Congress.

Dean Clement, head of the College of Agriculture in the B.C. University, to whom the offer was referred, announced recently that it had been declined as the birds were of too great value to the University for breeding purposes to dispose of them. The offer is said to be the highest ever made for utility stock.

British Children Travelling

More applications are now being received at the British passport office for names of children to be included in parents' passports than ever have been dealt with before. Travellers going abroad with their children are taking younger members of their families with them and the demand for children's accommodations has led to the making of many ships for young passengers.

Found More Money In Hay

A ton of hay bought for \$25 on the track at Hudson, Ont., costs \$175 at Red Lake. A far-sighted prospector staked about ten acres of comparatively clear land at Snake Falls. The following summer he cut and stacked twelve tons of wild hay which he sold to a transportation company for \$125 per ton in the stack; he has since ditched his pick and shovel in favor of a scythe and rake.

Poultry Business Profitable

Canada Not Yet Aware Of Importance Of Industry

An honor was paid to Canada by selecting Ottawa as the scene of the World's Poultry Congress. This is only the third congress that has been held, so that the place of the poultry in poultry matters has early received international recognition.

Canadians are so much accustomed to hear about the value of the wheat produced in the West, the value of our lumber and minerals, and the value of our manufactures, that the importance of the poultry industry is lost sight of.

There are few great poultry farms, but it is the few here and the few there that combine to make up a vast and, to those who know how to handle it, a very profitable business.

Fifty million dollars is the value of the annual production of eggs alone in this country. Many millions must be counted for poultry sold for the table.

Canadian eggs stand foremost in quality. They command the highest price of eggs imported by the British market.

That position is only achieved by the quality of the eggs. The reason for this is that the eggs are raised on the same principle applies to bacon, butter, cheese and every other product in these lines Canada is either falling behind or almost standing still.

There are too many farmers who are content to jog along doing a little better than just making ends meet. They need stirring up to a realization of their opportunities. They owe it to themselves and to Canada, so that every article that is brought by export buyers will measure up to one standard—the best and importers will have confidence that it is Canadian it is good.

Use Tar Sands On The Road

Ninety Carloads Of Tar Sands From Fort McMurray To Jasper

Ninety carloads of tar sands will be shipped from McMurray during the present summer, to be used in paving at Jasper Park. The work of curbing the roads is being supervised by Dr. S. C. Ellis, of Ottawa, who has spent several years investigating the tar sand deposits and experimenting with the material with a view of developing some means of utilizing the same. A piece of road paved with the tar sands in the City of Edmonton some years ago under the supervision of Dr. Ellis, is at almost as good condition today as it was when first laid down, in spite of heavy traffic.

Weight Of Rainfall

One Inch Of Rainfall Deposits 113 Tons Of Water On Each Acre

One does not usually associate rain with great weight. Even when the clouds let loose a torrential down-pour the mind reckons it in ounces rather than tons, yet one inch of rainfall deposits 113 tons of water on each acre of ground surface. To take an extreme case, so far as known rainfall, that of Cherrapunji, in India, on the watershed of the Ganges, nearly 20,000 tons have fallen in but one month, August. The average annual rainfall of 456 inches there comes to nearly 50,000 tons to the acre.

Car Salesmen: "And what kind of a burn would you like, sir? Do you care for a good, loud blast?" Haughty Customer: "No, I want something that just sneezes."

Migratory Birds Treaty Between Canada and U.S. Has Been Very Beneficial

Horses Deserve Best Of Care

Is Still Indispensable and Rewarding

The horse is a faithful, patient, friend of man. He deserves the utmost care and attention. He still plays an important part in the economy of the nation, and is still indispensable. In short hands he is the horse well kept for his usefulness, it pays to use him well from the standpoint of service. A well-fed, well-cared-for horse will be in a position to render better service than the horse which is neglected and half-fed.

Now that the hot weather is in evidence, these using and having the care of horses should give them extra attention. Of course, they should be well supplied with food and water, and they need a large quantity in the course of a day. There are two sources from which the working horse may suffer great annoyance and pain—one is the collar, the other the bit. Almost every working horse bears scars or a painful sore on the top of his neck, where the collar has rubbed him. Often he is compelled to wear a breast collar and this places him at a disadvantage when handling a heavy load. A properly fitted collar, well adjusted and padded, will cause no trouble.

Be good to your horse. He will be grateful to you and will render you increased service.

Retain Women Employees

No General Removal Of Policy On The Part Of The C.N.R.

"The Canadian National is not as a general principle, substituting men for women in the various editorial positions 'throughout its system,'" stated W. A. Kingland, general manager of passenger lines, Canadian National Railways.

Press reports that women were to be let out of clerical positions all over the country, and men substituted, caused consternation in the ranks of women workers for the railway, which situation is now clarified by Mr. Kingland's statement.

What is being done, Mr. Kingland stated, was that in certain clerical positions where, due to conditions, it was considered that men were better fitted for the work than women, men are being substituted, but there is no general removal to the policy which related before the war, when men were employed through the service, and few, if any, women.

Trying Colder Cures

By replacing white walls and red carpets in hospitals with delicate green, yellow, and mauve ones, it is claimed that patients are kept in a better temper, sleep well, and leave the hospital three days sooner than under the old conditions. One individual, afflicted with chronic insomnia, failed to sleep within an hour of the cheerful atmosphere of a room decorated in mauve.

Seek Cooler Motor Car

Experiments at the air research laboratory of the American Society of Heating and Ventilating Engineers in the Pittsburgh bureau of mines may lead to many developments in automobile design. According to F. C. Houston, director. Among the possibilities are mentioned white roofs and strips of damp burlap or some other device to lower temperature of air within.

"If spring shooting of migratory game birds had not been abolished throughout North America in 1916 there would not now be a sufficient number of birds of certain important species in providing shooting for anybody either in spring or fall."

This considered opinion of a Canadian game conservationist brings in to high relief the benefits of the Migratory Birds Treaty between Canada and the United States and the acts which implement it. The complete extinction of the passenger pigeon shows that this is not an overstatement, for while the cause of the passenger pigeon presents peculiar features, nevertheless the fact remains that this beautiful and useful bird was exterminated because of lack of protection at the spring nesting time. The passenger pigeon in the 80's of the last century stocked Canada and the northern United States by billions, yet not until was the process of extermination that this bird had completely disappeared nearly half a century ago.

There are other facts concerning the possible practical extinction of some of our remaining species of migratory game birds, yet not until was the process of extermination that this bird had completely disappeared nearly half a century ago. There are other facts concerning the possible practical extinction of some of our remaining species of migratory game birds, yet not until was the process of extermination that this bird had completely disappeared nearly half a century ago.

Another Royal Ranch

Land On Vancouver Island May Be Presented To Prince George

Prince George may be the recipient of a ranch at Cobble Hill, Vancouver Island, 800 acres in extent, and the Prince of Wales visit here this summer. The proposed presentation has been sponsored by the Associated Boards of Trade of Vancouver Island and the Government will be asked to vote \$25,000 for the purpose, the City of Victoria \$10,000 and other municipalities on the Island \$10,000. The remaining \$10,000 of the \$55,000 would be raised by public subscription. Although the ranch, including machinery and equipment, may be purchased for \$85,000, it is stated that \$10,000 of the total cost of the project will go before the Government almost immediately.

Hunting For New Double Stars

Through a huge telescope that has been completed after many months of work, astronomers propose a ten-year search for the double stars. An observatory in South Africa for the purpose of measuring the known double stars and to hunt for new ones. The project is being financed by the Government of South Africa and the project will go before the Government almost immediately.

RUNNING AHEAD OF THE TIMES

They are fashioned after the old electric car which made the famous run from Montreal to Vancouver in seventy-six hours in the fall of 1925, but they contain many improvements and are equipped with six-cylinder engines. Although many railways in the United States have endeavored to evolve a car which would be economical to operate as well as to satisfy the demands of traffic, the Canadian National Railways have been the only system, up to the present, successful in producing a self-propelled unit capable of fulfilling all the requirements. The cars are 72 feet in length and ten feet wide and have commodious baggage, passenger and smoking compartments. They can carry 200 gallons of fuel.
